

# PragmaDev starts an on-line survey on software modeling technologies and their usage.

Paris - France - January 25<sup>th</sup>, 2011 - *PragmaDev* starts an on-line survey on software modeling technologies and their usage on its web site.

The last few years the number of modeling technologies has dramatically increased, vertically to address different aspects of the development process (SDL, AADL, SysML), as well as horizontally to address different domains (SDL-RT, MARTE, Autosar). Shall the software be considered critical, shall it comply to a standard, or shall it be certified, modeling is of growing interest. The objective of that survey is to understand how these technologies are used and try to forecast the upcoming trends in that area. Results will be published for free at the end of the first quarter and all participants get a chance to win an iPad.

## About PragmaDev

PragmaDev is a privately held company based in Paris France that provides a set of modeling tools for the prototyping, the development, and the test of real time and embedded software: "Real Time Developer Studio" and "MSC Tracer". Real Time Developer Studio targets all development teams working on communicating systems with a unique combination of standard languages. The MSC Tracer is an on-line or off-line tracing tool generating live sequence diagrams.

Real Time Developer Studio provides three levels of modeling: informal, semi-formal, and fully formal modeling. While informal modeling is mainly used for documentation, the most advanced level of modeling allows simulation, prototyping, verification, full code generation, debug on target, and test of the model.

PragmaDev has established partnership with key players in the real time domain. Customers include Airbus, Renault, Alcatel, Thomson, the French Army, Nortel Networks, the European Space Agency, Toshiba, Korean Telecom, and LG Electronics.

PragmaDev and Real Time Developer Studio are registered trademarks of PragmaDev.  
All other names mentioned are trademarks, registered trademarks or service marks of their respective companies.
